Professional Summary

Data Engineer who builds dependable pipelines that collect, clean, store and serve data. Recent work includes a resumable multi-season football data backfill (~9,000 matches) with cached raw JSON, re-parse without re-fetch and weekly GitHub Actions jobs; a live sports data engine with caching across 20+ competitions; statement and email ingestion with deduplication and a review queue; and Postgres/Supabase schemas with row-level security and cron jobs. Background in data analytics and BI means I build pipelines with the downstream dashboard and model in mind.

Work Experience

Freelance Data Engineer
Pipelines, Data Collection & Storage | Remote
2023 – Present

- Built a **weekly data pipeline** for a football prediction model: a resumable multi-season backfill (~9,000 matches), a polite cached scraper (gzipped raw JSON, exponential backoff, re-parse without re-fetch), a **SQLite** store, and **GitHub Actions** jobs for scrape, retrain, predict and redeploy.
- Built **Sports Bet Claude**, a sports analytics engine (**Python, Flask, Playwright, Docker**) that collects form, xG and head-to-head data across 20+ competitions and 4 sports, scores picks with **sample-size-shrunk hit rates**, grades every pick against real results, and **re-calibrates its own confidence** each week.
- Built **Finlo**, a cross-platform personal finance app for **Android, iOS and web from one codebase** (**Expo, React Native, TypeScript, SQLite**): multi-currency money engine on integer minor units, time-aware budgets, receipt OCR and read-only Gmail import, and PDF/Excel/CSV reports, covered by **347 automated tests**.
- Designed the **ShiftPilot** backend on **Supabase/Postgres**: schema with **Row-Level Security**, a SQL conflict-check function, an **Edge Function cron** (pg_cron + pg_net) that recomputes leave-by times from live traffic, and an inbound-email webhook that calls the **Anthropic API** to parse shifts.
- Automated e-commerce operations for a retail client: scraped the store catalogue via the Bumpa API, generated **Google Merchant Center feeds** (one Excel file per category plus an issues sheet), and built a **photo-prep tool** that removes backgrounds, squares and compresses product photos.

Technotrend Platforms Nigeria Ltd.
Data Specialist / Product Analyst / Backend Developer
2023 - 2025

- Built the **Node.js and Python services** behind internal admin dashboards for VAS subscription management, user onboarding and **automated reporting workflows**.
- Created interactive reports and dashboards using **Tableau, Excel and Power BI**, accelerating decisions and reducing report generation time by **30%**.
- Monitored and reported on VAS sales funnel performance across **IVR, USSD, SMS and Web**, tracking **KPIs** such as **CTR**, conversion rate, **ARPU** and churn to find optimisation opportunities.
- Developed and deployed **machine learning models** for personalised content recommendations, resulting in a **25% increase in user engagement**.
- Conducted data analysis that identified key user behaviours, leading to a **15% increase in user retention** and a **20% boost in website performance**.

Extern | Beats by Dre.
Consumer Insights and Market Intelligence (Remote Extern)
2024

- Researched **macro consumer trends among Gen Z** and benchmarked brand sentiment against key competitors.
- Developed and presented a **data-driven strategy** for connecting with Gen Z, using surveys, interviews and market analysis.

Azubi Africa
Data Analytics Professional
2022 - 2023

- Led multiple data analytics projects, improving team efficiency by **20%** through streamlined communication and task allocation.
- Developed machine learning models that enhanced data analysis, leading to a **10% improvement in prediction accuracy** and better resource allocation.

Earlier Experience

- **O'dua Telecoms, Onet** – *Technology Intern* (2017 - 2018): Provided technical support and troubleshooting, improving system uptime by **15%**.
- **Africa Internet Holdings (JUMIA)** – *Quality Control* (2015): Monitored and enforced quality standards across operations, reducing the defective product rate by **10%**.
- **Africa Internet Holdings (KAYMU)** – *Content Manager* (2013): Managed and optimised site content, leading to a **12% increase in site traffic** and improved SEO performance.

Education

Obafemi Awolowo University
Bachelor of Computer Science with Economics
2014 - 2021

Certifications

- **Google Data Analytics Professional** (2022) (**Certified**)
- **IIM Certified Data Protection Officer (CDPO), issued under NDPC authority** (2026) (**Certified**)
- **Azubi Africa Data Analytics Professional** (2022 - 2023) (**Certified**)
- **ALX AiCE AI Career Essentials** (2024) (**Certified**)
- **AWS Cloud Practitioner** (2022) (**Certified**)
- **McKinsey Forward Thinking** (2022 - 2023) (**Certified**)
- **Python for Financial Analysis and Algorithm Trading** (2020)

Skills

Technical Skills

- **Data pipelines:** ETL/ELT in Python, web data extraction, scheduled jobs (GitHub Actions, pg_cron), caching and incremental loads
- **SQL:** PostgreSQL, MySQL, BigQuery, SQLite
- **Databases:** PostgreSQL, Supabase (Row-Level Security, Edge Functions, pg_cron, realtime), MySQL, SQLite, BigQuery, Prisma
- **Web data collection:** Playwright, HTTP/JSON APIs, polite scraping (caching, backoff, rate limits)
- **Python data stack:** pandas, NumPy, scikit-learn, XGBoost, deep learning (LSTM, Transformer), Jupyter
- **DevOps & Cloud:** Git/GitHub, GitHub Actions, Docker, Vercel, VPS deployment (Vultr), AWS (Cloud Practitioner)
- **BI & Visualisation:** Power BI, Tableau, Excel (XLOOKUP, Pivot Tables, VBA, simulations), Streamlit, Matplotlib/Seaborn
- **Soft skills:** Analytical Thinking, Problem Solving, Data Storytelling, Stakeholder Communication, Attention to Detail, Time Management
- **Languages:** English (Native), French (Basics), Spanish (Basics), Arabic (Basics)

Projects/Articles

Personal Projects

- **Solana Signal Bot** – async token scanner, call parser and alert broadcaster (Python)
- **Football Shots Model** – XGBoost + Poisson player-shots predictor with weekly auto-retrain (Streamlit)
- **Sports Bet Claude** – self-calibrating sports analytics engine (Python, Flask, Playwright, Docker)
- **Finlo** – multi-currency budgeting and forecasting app (Expo, React Native, TypeScript, SQLite, Gemini)
