Professional Summary

QA Automation Engineer who builds test suites that catch problems before users do. I wrote a 103-scenario Playwright suite (SIT and UAT stages) for a NestJS and React property-management platform, with Excel and JSON reports and a screenshot for every failure; shipped a finance app backed by 347 automated tests; and verified a chess engine with perft testing. At Technotrend I worked on fraud-prevention and double opt-in validation workflows and ran A/B tests, so I look for real-user edge cases, not just the happy path.
