Professional Summary

Detail-focused QA Tester who plans, runs and documents tests so developers can fix issues fast. I executed and documented 103 test scenarios (SIT and UAT) for a property-management web platform, logging every result in Excel with a screenshot of each failure, and I can automate repeat checks in Playwright. An earlier quality-control role at Jumia reduced the defective rate by 10%, and my analytics background means I verify the data behind the screen as well as the screen itself.
