Professional Summary

AI Automation Engineer who connects LLMs, APIs and browsers into workflows that run on their own. I have built an email-to-shift pipeline where Claude extracts details from forwarded emails, a 4-layer categoriser with a Gemini fallback, an AI sales assistant with 8 tools for online stores, a multi-agent crypto-research system, Telegram bots with copy-trading and scheduled automations, and Playwright automation with live Socket.IO control dashboards. I design for reliability: review queues for low-confidence output, untrusted-input handling and clear logs.

Work Experience

Freelance AI Automation Engineer
LLM Integration, Agents & Browser Automation | Remote
2023 – Present

- Built **ShiftPilot**, a shift-scheduling app for agency workers (**Expo Router, TypeScript, Supabase/Postgres with Row-Level Security, realtime**): conflict detection in SQL, a **pg_cron "leave-by" engine** that uses Google Maps live traffic to send push alerts, and an **email webhook where Claude extracts shift details** into a review queue.
- Built an **AI sales assistant for online stores** (**Python, Gemini function calling, Telegram Bot API, SQLite**) with 8 tools (product search, stock check, recommendations, order totals with delivery and promo codes, bundle deals) that replies in English or Nigerian Pidgin.
- Built **PROWL**, an AI crypto-research agent with a live dashboard (**React 19, Vite, Tailwind, Supabase, Python backend**): a **multi-agent pipeline** where Scout finds trending narratives on X/Telegram, Guard runs **17 contract-safety checks** via the GoPlus API, and an execution agent acts on approved tokens.
- Built **Finlo**, a finance app with a **4-layer transaction categoriser** (user rules, history, merchant lexicon, **Gemini LLM fallback**). Receipt OCR and read-only Gmail parsing feed a review queue, and email content is treated as untrusted input (tested against prompt injection).
- Built modular **browser automation systems** with **Python and Playwright**, plus **Flask + Socket.IO dashboards** for real-time control and status tracking of parallel automated browser sessions.

- Automated e-commerce operations for a retail client: scraped the store catalogue via the Bumpa API, generated **Google Merchant Center feeds** (one Excel file per category plus an issues sheet), and built a **photo-prep tool** that removes backgrounds, squares and compresses product photos.
- Built **Hood Watch**, a Telegram trading bot (**Node.js, grammY, viem, GramJS**): encrypted wallets, Uniswap v2/v3/v4 route simulation, take-profit and stop-loss automation, **copy-trading from Telegram channels**, and auto-generated PnL share cards.
- Integrated **LLM APIs (Claude/Anthropic, Gemini)** into automated pipelines for AI-driven document generation, intelligent data extraction and end-to-end workflow automation.

Technotrend Platforms Nigeria Ltd.
Data Specialist / Backend Developer / Product Analyst
2023 - 2025

- Built the **Node.js and Python services** behind internal admin dashboards for VAS subscription management, user onboarding and **automated reporting workflows**.
- Developed and deployed **machine learning models** for personalised content recommendations, resulting in a **25% increase in user engagement**.
- Implemented **fraud detection** checks and **double opt-in validation** workflows for subscription services, keeping the platform compliant with telecom regulations.
- Monitored and reported on VAS sales funnel performance across **IVR, USSD, SMS and Web**, tracking **KPIs** such as **CTR**, conversion rate, **ARPU** and churn to find optimisation opportunities.
- Created interactive reports and dashboards using **Tableau, Excel and Power BI**, accelerating decisions and reducing report generation time by **30%**.

Extern | Beats by Dre.
Consumer Insights and Market Intelligence (Remote Extern)
2024

- Researched **macro consumer trends among Gen Z** and benchmarked brand sentiment against key competitors.
- Developed and presented a **data-driven strategy** for connecting with Gen Z, using surveys, interviews and market analysis.

Azubi Africa
Data Analytics Professional
2022 - 2023

- Led multiple data analytics projects, improving team efficiency by **20%** through streamlined communication and task allocation.
- Developed machine learning models that enhanced data analysis, leading to a **10% improvement in prediction accuracy** and better resource allocation.

Earlier Experience

- **O'dua Telecoms, Onet** – *Technology Intern* (2017 - 2018): Provided technical support and troubleshooting, improving system uptime by **15%**.
- **Africa Internet Holdings (JUMIA)** – *Quality Control* (2015): Monitored and enforced quality standards across operations, reducing the defective product rate by **10%**.
- **Africa Internet Holdings (KAYMU)** – *Content Manager* (2013): Managed and optimised site content, leading to a **12% increase in site traffic** and improved SEO performance.

Education

Obafemi Awolowo University
Bachelor of Computer Science with Economics
2014 - 2021

Certifications

- **ALX AiCE AI Career Essentials** (2024) (**Certified**)
- **IIM Certified Data Protection Officer (CDPO), NDPC authority** (2026) (**Certified**)
- **AWS Cloud Practitioner** (2022) (**Certified**)
- **Google Data Analytics Professional** (2022) (**Certified**)
- **Azubi Africa Data Analytics Professional** (2022 - 2023) (**Certified**)
- **McKinsey Forward Thinking** (2022 - 2023) (**Certified**)
- **Python for Financial Analysis and Algorithm Trading** (2020)

Skills

Technical Skills

- **LLM / AI APIs:** Claude (Anthropic), Gemini, function calling / tool use, structured extraction
- **AI agents & automation:** multi-agent pipelines, Telegram/WhatsApp bots, email and webhook triggers, scheduled jobs
- **Browser automation:** Playwright, Selenium, multi-instance orchestration, Flask + Socket.IO control dashboards
- **Prompt engineering:** system prompts, tool schemas, evaluation rubrics, prompt-injection-aware design
- **Backend:** Node.js, NestJS (QA contributor), Python (Flask, FastAPI, Django), REST APIs, WebSockets / Socket.IO
- **Databases:** PostgreSQL, Supabase (Row-Level Security, Edge Functions, pg_cron, realtime), MySQL, SQLite, BigQuery, Prisma
- **DevOps & Cloud:** Git/GitHub, GitHub Actions, Docker, Vercel, VPS deployment (Vultr), AWS (Cloud Practitioner)
- **Soft skills:** Analytical Thinking, Problem Solving, Experimental Mindset, Clear Written Communication, Fast Learner, Time Management
- **Languages:** English (Native), French (Basics), Spanish (Basics), Arabic (Basics)

Projects/Articles

Personal Projects

- **Solana Signal Bot** – async token scanner, call parser and alert broadcaster (Python)
- **ShiftPilot** – shift scheduler with live-traffic leave-by alerts and AI email parsing (Expo, Supabase, Claude)
- **AI Sales Assistant** – Telegram shopping bot with Gemini function calling and SQLite catalogue
- **PROWL** – multi-agent AI crypto-research dashboard (React 19, Supabase, Python) – prowl-agent.xyz
