- **LinkedIn**: Abdulakeem Adebayo
- **Medium**: @adebayoabdulakeem

- **Portfolio**:badim04.github.io/ai-engineer

Professional Summary

AI Engineer combining machine learning foundations with hands-on LLM application work. I build products where AI does real work: structured extraction with Claude, Gemini function-calling assistants, multi-agent research pipelines, LLM categorisation with confidence gating, and evaluation tasks that probe frontier model limits. On the ML side I have shipped forecasting with backtest-based model selection, an XGBoost + Poisson prediction system, and a 15-model ensemble with FinBERT sentiment. I pay attention to evaluation, cost, safety (prompt-injection-aware design) and graceful fallbacks.

Work Experience

Freelance AI Engineer
LLM Applications, ML Systems & Model Evaluation | Remote
2023 – Present

- Built **ShiftPilot**, a shift-scheduling app for agency workers (**Expo Router, TypeScript, Supabase/Postgres with Row-Level Security, realtime**): conflict detection in SQL, a **pg_cron "leave-by" engine** that uses Google Maps live traffic to send push alerts, and an **email webhook where Claude extracts shift details** into a review queue.
- Built **Finlo**, a finance app with a **4-layer transaction categoriser** (user rules, history, merchant lexicon, **Gemini LLM fallback**). Receipt OCR and read-only Gmail parsing feed a review queue, and email content is treated as untrusted input (tested against prompt injection).
- Built an **AI sales assistant for online stores** (**Python, Gemini function calling, Telegram Bot API, SQLite**) with 8 tools (product search, stock check, recommendations, order totals with delivery and promo codes, bundle deals) that replies in English or Nigerian Pidgin.
- Built **PROWL**, an AI crypto-research agent with a live dashboard (**React 19, Vite, Tailwind, Supabase, Python backend**): a **multi-agent pipeline** where Scout finds trending narratives on X/Telegram, Guard runs **17 contract-safety checks** via the GoPlus API, and an execution agent acts on approved tokens.
- Designed and contributed **adversarial evaluation tasks for frontier LLM benchmarking** projects, probing model capability limits through binary recovery scenarios and domain-specific knowledge tasks.

- Built a **football shots prediction model** (**Python, XGBoost, Poisson thresholds, SQLite, Streamlit, GitHub Actions**) trained on about **9,000 matches across 8 competitions**: leakage-safe rolling features, opponent defence z-scores, time-based holdout and drift checks, retrained automatically every week.
- Engineered a **15-component Python ML ensemble trading system** combining **LSTM, Transformer, XGBoost and Random Forest** models with **FinBERT** news sentiment analysis and a real-time web monitoring dashboard.
- Built **DELIVER**, an on-chain escrow and staking marketplace for AI agents (**Solidity, Hardhat, OpenZeppelin, Next.js 15, Prisma, ethers v6**): agents stake collateral, results are verified, and failed work is slashed back to the requester. Contract logic is covered by tests.

Technotrend Platforms Nigeria Ltd.
Data Specialist / Backend Developer / Product Analyst
2023 - 2025

- Developed and deployed **machine learning models** for personalised content recommendations, resulting in a **25% increase in user engagement**.
- Implemented **A/B testing**, optimising features and improving customer satisfaction by **18%** based on statistical results.
- Conducted data analysis that identified key user behaviours, leading to a **15% increase in user retention** and a **20% boost in website performance**.
- Built the **Node.js and Python services** behind internal admin dashboards for VAS subscription management, user onboarding and **automated reporting workflows**.

Extern | Beats by Dre.
Consumer Insights and Market Intelligence (Remote Extern)
2024

- Researched **macro consumer trends among Gen Z** and benchmarked brand sentiment against key competitors.
- Developed and presented a **data-driven strategy** for connecting with Gen Z, using surveys, interviews and market analysis.

Azubi Africa
Data Analytics Professional
2022 - 2023

- Led multiple data analytics projects, improving team efficiency by **20%** through streamlined communication and task allocation.
- Developed machine learning models that enhanced data analysis, leading to a **10% improvement in prediction accuracy** and better resource allocation.

Earlier Experience

- **O'dua Telecoms, Onet** – *Technology Intern* (2017 - 2018): Provided technical support and troubleshooting, improving system uptime by **15%**.
- **Africa Internet Holdings (JUMIA)** – *Quality Control* (2015): Monitored and enforced quality standards across operations, reducing the defective product rate by **10%**.
- **Africa Internet Holdings (KAYMU)** – *Content Manager* (2013): Managed and optimised site content, leading to a **12% increase in site traffic** and improved SEO performance.

Education

Obafemi Awolowo University
Bachelor of Computer Science with Economics
2014 - 2021

Certifications

- **ALX AiCE AI Career Essentials** (2024) (**Certified**)
- **IIM Certified Data Protection Officer (CDPO), NDPC authority** (2026) (**Certified**)
- **AWS Cloud Practitioner** (2022) (**Certified**)
- **Google Data Analytics Professional** (2022) (**Certified**)
- **Azubi Africa Data Analytics Professional** (2022 - 2023) (**Certified**)
- **McKinsey Forward Thinking** (2022 - 2023) (**Certified**)
- **Python for Financial Analysis and Algorithm Trading** (2020)

Skills

Technical Skills

- **LLM / AI APIs:** Claude (Anthropic), Gemini, function calling / tool use, structured extraction
- **Prompt engineering:** system prompts, tool schemas, evaluation rubrics, prompt-injection-aware design
- **AI agents & automation:** multi-agent pipelines, Telegram/WhatsApp bots, email and webhook triggers, scheduled jobs
- **LLM evaluation:** adversarial task design, frontier model benchmarking, data annotation, quality review
- **Machine learning:** classification, regression, time-series forecasting, ensembles (LSTM, Transformer, XGBoost, Random Forest), Poisson models
- **Python data stack:** pandas, NumPy, scikit-learn, XGBoost, deep learning (LSTM, Transformer), Jupyter
- **NLP:** FinBERT sentiment analysis, LLM-based extraction and classification
- **Backend:** Node.js, NestJS (QA contributor), Python (Flask, FastAPI, Django), REST APIs, WebSockets / Socket.IO
- **Soft skills:** Analytical Thinking, Problem Solving, Experimental Mindset, Clear Written Communication, Fast Learner, Time Management
- **Languages:** English (Native), French (Basics), Spanish (Basics), Arabic (Basics)

Projects/Articles

Personal Projects

- **ShiftPilot** – shift scheduler with live-traffic leave-by alerts and AI email parsing (Expo, Supabase, Claude)
- **Finlo** – multi-currency budgeting and forecasting app (Expo, React Native, TypeScript, SQLite, Gemini)
- **AI Sales Assistant** – Telegram shopping bot with Gemini function calling and SQLite catalogue
- **PROWL** – multi-agent AI crypto-research dashboard (React 19, Supabase, Python) – prowl-agent.xyz
