Professional Summary

Backend Developer who builds reliable server-side systems: real-time WebSocket servers, REST APIs, relational schemas with row-level security, scheduled jobs and third-party integrations. Highlights include an authoritative game server with matchmaking, ratings, anti-cheat and an audited money ledger; a Supabase backend with SQL conflict checks, cron-driven traffic lookups and AI email parsing; and telecom VAS services handling subscriptions, fraud checks and double opt-in. Strong in Node.js and Python, with careful handling of correctness (integer money, idempotency, tests) and deployment on Docker, VPS and Vercel.

Work Experience

Freelance Backend Developer
APIs, Real-Time Systems & Integrations | Remote
2023 – Present

- Engineered the **VersusX** game server (**Node.js, WebSockets, SQLite**): authoritative rules for 13 games, **deterministic physics shared by browser and server**, Glicko-2 ratings, matchmaking, an **anti-cheat analysis worker thread**, escrowed stakes with a ledger audit script, and one-action-per-account rules enforced in the database.
- Designed the **ShiftPilot** backend on **Supabase/Postgres**: schema with **Row-Level Security**, a SQL conflict-check function, an **Edge Function cron** (pg_cron + pg_net) that recomputes leave-by times from live traffic, and an inbound-email webhook that calls the **Anthropic API** to parse shifts.
- Built **Caresync EMR**, an electronic medical records platform (**pnpm monorepo: Next.js 15 web, Expo mobile, Supabase**) with **7 roles enforced by Row-Level Security** (doctor, nurse, lab scientist, pharmacist, patient…), covering patients, appointments, consultations, lab reports, prescriptions and drug inventory.
- Built **DELIVER**, an on-chain escrow and staking marketplace for AI agents (**Solidity, Hardhat, OpenZeppelin, Next.js 15, Prisma, ethers v6**): agents stake collateral, results are verified, and failed work is slashed back to the requester. Contract logic is covered by tests.

- Built a **weekly data pipeline** for a football prediction model: a resumable multi-season backfill (~9,000 matches), a polite cached scraper (gzipped raw JSON, exponential backoff, re-parse without re-fetch), a **SQLite** store, and **GitHub Actions** jobs for scrape, retrain, predict and redeploy.
- Built an **AI sales assistant for online stores** (**Python, Gemini function calling, Telegram Bot API, SQLite**) with 8 tools (product search, stock check, recommendations, order totals with delivery and promo codes, bundle deals) that replies in English or Nigerian Pidgin.

Technotrend Platforms Nigeria Ltd.
Backend Developer / Data Specialist / Product Analyst
2023 - 2025

- Built the **Node.js and Python services** behind internal admin dashboards for VAS subscription management, user onboarding and **automated reporting workflows**.
- Coordinated **VAS (Value-Added Services)** product implementations including **Miniloan** and **Call Collect**, managing communication between client stakeholders and third-party providers using **Voice Event Manager (VEM)** for IVR-based delivery.
- Implemented **fraud detection** checks and **double opt-in validation** workflows for subscription services, keeping the platform compliant with telecom regulations.
- Monitored and reported on VAS sales funnel performance across **IVR, USSD, SMS and Web**, tracking **KPIs** such as **CTR**, conversion rate, **ARPU** and churn to find optimisation opportunities.
- Conducted data analysis that identified key user behaviours, leading to a **15% increase in user retention** and a **20% boost in website performance**.
- Developed and deployed **machine learning models** for personalised content recommendations, resulting in a **25% increase in user engagement**.

Extern | Beats by Dre.
Consumer Insights and Market Intelligence (Remote Extern)
2024

- Researched **macro consumer trends among Gen Z** and benchmarked brand sentiment against key competitors.
- Developed and presented a **data-driven strategy** for connecting with Gen Z, using surveys, interviews and market analysis.

Azubi Africa
Data Analytics Professional
2022 - 2023

- Led multiple data analytics projects, improving team efficiency by **20%** through streamlined communication and task allocation.
- Developed machine learning models that enhanced data analysis, leading to a **10% improvement in prediction accuracy** and better resource allocation.

Earlier Experience

- **O'dua Telecoms, Onet** – *Technology Intern* (2017 - 2018): Provided technical support and troubleshooting, improving system uptime by **15%**.
- **Africa Internet Holdings (JUMIA)** – *Quality Control* (2015): Monitored and enforced quality standards across operations, reducing the defective product rate by **10%**.
- **Africa Internet Holdings (KAYMU)** – *Content Manager* (2013): Managed and optimised site content, leading to a **12% increase in site traffic** and improved SEO performance.

Education

Obafemi Awolowo University
Bachelor of Computer Science with Economics
2014 - 2021

Certifications

- **AWS Cloud Practitioner** (2022) (**Certified**)
- **IIM Certified Data Protection Officer (CDPO), NDPC authority** (2026) (**Certified**)
- **ALX AiCE AI Career Essentials** (2024) (**Certified**)
- **Google Data Analytics Professional** (2022) (**Certified**)
- **Azubi Africa Data Analytics Professional** (2022 - 2023) (**Certified**)
- **McKinsey Forward Thinking** (2022 - 2023) (**Certified**)
- **Python for Financial Analysis and Algorithm Trading** (2020)

Skills

Technical Skills

- **Backend:** Node.js, NestJS (QA contributor), Python (Flask, FastAPI, Django), REST APIs, WebSockets / Socket.IO
- **Databases:** PostgreSQL, Supabase (Row-Level Security, Edge Functions, pg_cron, realtime), MySQL, SQLite, BigQuery, Prisma
- **DevOps & Cloud:** Git/GitHub, GitHub Actions, Docker, Vercel, VPS deployment (Vultr), AWS (Cloud Practitioner)
- **Testing & QA:** Vitest, Jest, Playwright end-to-end tests, Hardhat contract tests
- **Web3:** Solidity, Hardhat, OpenZeppelin, ethers.js, viem, Solana
- **LLM / AI APIs:** Claude (Anthropic), Gemini, function calling / tool use, structured extraction
- **Frontend:** React, Next.js 15, TypeScript, JavaScript (ES2023), HTML5, CSS3, Tailwind CSS, Framer Motion, Bootstrap
- **Soft skills:** Analytical Thinking, Problem Solving, Ownership of end-to-end delivery, Clear technical documentation, Fast Learner, Time Management
- **Languages:** English (Native), French (Basics), Spanish (Basics), Arabic (Basics)

Projects/Articles

Personal Projects

- **Sports Bet Claude** – self-calibrating sports analytics engine (Python, Flask, Playwright, Docker)
- **Hood Watch** – Telegram trading bot with copy-trading and auto take-profit (Node.js, viem)
- **Oikos QA Suite** – 103 automated Playwright test scenarios for a property-management SaaS
