Professional Summary

Data Scientist with hands-on experience taking models from raw data to production. I have built a player-level football shots model on ~9,000 matches (XGBoost + Poisson, weekly auto-retraining), a self-calibrating sports prediction engine that grades its own picks, a 15-model trading ensemble with FinBERT sentiment, and forecasting that picks the best of three models by rolling-origin backtest. In industry, my recommendation models raised user engagement by 25% and A/B tests improved satisfaction by 18%. I care about leakage-safe features, honest validation and explaining results to non-technical stakeholders.

Work Experience

Freelance Data Scientist & ML Engineer
Predictive Modelling, Forecasting & ML Systems | Remote
2023 – Present

- Built a **football shots prediction model** (**Python, XGBoost, Poisson thresholds, SQLite, Streamlit, GitHub Actions**) trained on about **9,000 matches across 8 competitions**: leakage-safe rolling features, opponent defence z-scores, time-based holdout and drift checks, retrained automatically every week.
- Built **Sports Bet Claude**, a sports analytics engine (**Python, Flask, Playwright, Docker**) that collects form, xG and head-to-head data across 20+ competitions and 4 sports, scores picks with **sample-size-shrunk hit rates**, grades every pick against real results, and **re-calibrates its own confidence** each week.
- Engineered a **15-component Python ML ensemble trading system** combining **LSTM, Transformer, XGBoost and Random Forest** models with **FinBERT** news sentiment analysis and a real-time web monitoring dashboard.
- Built the analytics core of **Finlo**, a personal finance app: **three forecasting models** (Holt linear trend, seasonal naive, mean) compete on a **rolling-origin backtest** and ship with their error rate; prediction bands widen with the horizon; plus anomaly and recurring-payment detection.
- Developed **MQL5 Expert Advisors** and a **Python event-driven backtester** for Smart Money Concepts strategies (fair value gaps, order blocks, liquidity sweeps), enforcing prop-firm risk rules (3% daily and 6% max loss) with no look-ahead bias.

- Designed and contributed **adversarial evaluation tasks for frontier LLM benchmarking** projects, probing model capability limits through binary recovery scenarios and domain-specific knowledge tasks.

Technotrend Platforms Nigeria Ltd.
Data Specialist / Product Analyst / Backend Developer
2023 - 2025

- Developed and deployed **machine learning models** for personalised content recommendations, resulting in a **25% increase in user engagement**.
- Conducted data analysis that identified key user behaviours, leading to a **15% increase in user retention** and a **20% boost in website performance**.
- Implemented **A/B testing**, optimising features and improving customer satisfaction by **18%** based on statistical results.
- Created interactive reports and dashboards using **Tableau, Excel and Power BI**, accelerating decisions and reducing report generation time by **30%**.
- Monitored and reported on VAS sales funnel performance across **IVR, USSD, SMS and Web**, tracking **KPIs** such as **CTR**, conversion rate, **ARPU** and churn to find optimisation opportunities.
- Facilitated implementation of **fraud detection** mechanisms and **double opt-in validation** workflows, aligning client requirements with provider capabilities for regulatory compliance.

Extern | Beats by Dre.
Consumer Insights and Market Intelligence (Remote Extern)
2024

- Researched **macro consumer trends among Gen Z** and benchmarked brand sentiment against key competitors.
- Developed and presented a **data-driven strategy** for connecting with Gen Z, using surveys, interviews and market analysis.

Azubi Africa
Data Analytics Professional
2022 - 2023

- Led multiple data analytics projects, improving team efficiency by **20%** through streamlined communication and task allocation.
- Developed machine learning models that enhanced data analysis, leading to a **10% improvement in prediction accuracy** and better resource allocation.

Earlier Experience

- **O'dua Telecoms, Onet** – *Technology Intern* (2017 - 2018): Provided technical support and troubleshooting, improving system uptime by **15%**.
- **Africa Internet Holdings (JUMIA)** – *Quality Control* (2015): Monitored and enforced quality standards across operations, reducing the defective product rate by **10%**.
- **Africa Internet Holdings (KAYMU)** – *Content Manager* (2013): Managed and optimised site content, leading to a **12% increase in site traffic** and improved SEO performance.

Education

Obafemi Awolowo University
Bachelor of Computer Science with Economics
2014 - 2021

Certifications

- **Google Data Analytics Professional** (2022) (**Certified**)
- **IIM Certified Data Protection Officer (CDPO), NDPC authority** (2026) (**Certified**)
- **Azubi Africa Data Analytics Professional** (2022 - 2023) (**Certified**)
- **ALX AiCE AI Career Essentials** (2024) (**Certified**)
- **AWS Cloud Practitioner** (2022) (**Certified**)
- **McKinsey Forward Thinking** (2022 - 2023) (**Certified**)
- **Python for Financial Analysis and Algorithm Trading** (2020)

Skills

Technical Skills

- **Python data stack:** pandas, NumPy, scikit-learn, XGBoost, deep learning (LSTM, Transformer), Jupyter
- **Machine learning:** classification, regression, time-series forecasting, ensembles (LSTM, Transformer, XGBoost, Random Forest), Poisson models
- **NLP:** FinBERT sentiment analysis, LLM-based extraction and classification
- **Statistics:** A/B testing, hypothesis testing, backtesting, calibration, cohort and RFM analysis
- **SQL:** PostgreSQL, MySQL, BigQuery, SQLite
- **BI & Visualisation:** Power BI, Tableau, Excel (XLOOKUP, Pivot Tables, VBA, simulations), Streamlit, Matplotlib/Seaborn
- **Data preparation:** data cleaning, EDA, outlier handling, feature engineering
- **Data pipelines:** ETL/ELT in Python, web data extraction, scheduled jobs (GitHub Actions, pg_cron), caching and incremental loads
- **Soft skills:** Analytical Thinking, Problem Solving, Data Storytelling, Stakeholder Communication, Attention to Detail, Time Management
- **Languages:** English (Native), French (Basics), Spanish (Basics), Arabic (Basics)

Projects/Articles

Personal Projects

- **Customer Churn ML Prediction** – classification models (published on Medium)
- **Data Analysis on Indian Start-Up Funding** – EDA and Power BI dashboard
- **Bitcoin Price Prediction Application** using LSTM
