Professional Summary

Frontend Developer focused on fast, accessible and well-crafted interfaces for web and mobile. I build with React, Next.js, TypeScript and Tailwind, and ship the same codebase to iOS, Android and the web with React Native and Expo. My work includes a 14-screen finance app with its own design system and colour-blind-validated charts, a 13-game real-time web app with a 3D racing mode, a fashion site with virtual try-on, and a medical records dashboard. I care about clear layouts, sensible states (empty, loading, error) and testing that keeps the UI honest.

Privacy policy and Play Store assets are hosted on **Vercel**.
